

This repository contains CloudCamp Assignment 6 which aims to create Azure storage account, blob and fileshare. Tasks are listed below;

1. Provision the lab environment
 2. Create and configure Azure storage accounts
 3. Manage blob storage
 4. Manage authentication and authorization for Azure Storage
 5. Create and configure an
 6. Azure Files shares
 7. Manage network access for Azure Storage
- Umit Ilhan

SAS tokens can be limited with IP match and/or virtual network. If you configured it to Access only certain IP's other IP's will see an error like;

If IP is whitelisted user can see document and/or directory without error.

You can configure this on Storage Account Name -> Networking blade tab.

Storage account
